snakat-litjson

A *.Net* library to handle conversions from and to JSON (JavaScript Object Notation) strings.

This is a modifier of *litjson* that supports the following features.

Features

Set alias for serializable field/property

You can serialize/deserialize a member with a custom name.

```
[JsonSerialize ("float_value")]
public float FloatValue;
```

```
{
  "float_value": 0.0
}
```

Opt out serializing a field/property

You can hide a member from serializing.

```
[JsonIgnore]
public double DoubleValue;
```

```
{
}
```

Serialize a non-public field/property

You can serialize/deserialize a non-public member.

```
[JsonSerialize]
private float FloatValue;
```

```
{
  "FloatValue": 0.0
}
```
